XX

PT New complexes of protein-protein interactions in Helicobacter pylori,

PT useful for identifying modulating compounds for treating or preventing

PT ulcers in mammals.

XX

PS Claim 6; Page 477; 642pp; English.

XX

CC The invention describes a complex of protein-protein interactions in

CC Helicobacter pylori selected from 421 complexes given in the

CC specification. The complex of protein-protein interactions are useful for  
CC screening for agents which modulate the interaction of proteins.

CC Modulating compounds which binds to a targeted bacterial protein may be

CC used for treating or preventing ulcers in a human or animal. This is the

CC amino acid sequence of a selected interacting domain (SID), identified

CC via protein-protein interactions. Note: Where the patent number printed

CC at the top of the pages in the specification has obscured areas of

CC protein sequence, the indexer has replaced the residue with an X to

CC represent an illegible residue
